Relatório de Monitoramento e Manutenção de Sistema

Correção de Bugs

Calculadora

Autor: Jacir Gaio

SENAC

Sumário

Introdução

Este relatório tem o objetivo de evidenciar as correções de bugs e aprimoramento do projeto de uma calculadora desenvolvida com react native, bem como o versionamento utilizando a ferramenta Git e o repositório GitHub.

Abordaremos as etapas de desenvolvimento, versionamento e colaboração realizadas no projeto da calculadora, destacando os comandos Git utilizados, capturas de tela do repositório remoto e as correções implementadas para melhorar sua funcionalidade e usabilidade.

Relação de Bugs encontrados

Tag de fechamento do primeiro <View>
A tag de fechamento está escrita como **<View>**, o que causa um erro de sintaxe.

Erro de posicionamento das teclas numéricas e de sinais
Necessário a reorganização para melhorar a usabilidade e a experiência do usuário, tornando a disposição das teclas mais familiar e intuitiva,

Operações incorretas no switch do calculator()
Há erros nos casos das operações de multiplicação (*) e divisão (/). Eles estão sendo tratados da mesma maneira que os casos de adição (+) e subtração (-).

Tratamento inadequado para o sinal de +/-
O case para o sinal de +/- está vazio e precisa ser implementado para alternar entre números positivos e negativos.

Lógica incorreta para o caso de 'DEL'
O corte do currentNumber ao pressionar 'DEL' está removendo dois caracteres em vez de apenas um.

Após a correção foi realizado commit para um dos bugs encontrados e enviado as alterações para o repositório. Na próxima seção estão apresentados os comandos executados no GIT.

Comandos digitados

Comandos de configuração do Git:
```
git config --global user.name "Jacir"

git config --global user.email jgeletro@msn.com
```

Comandos de versionamento do Git:
```
git init

git add .

git commit -m "Projeto inicial"

git status

git add .

git commit -m "Projeto atualizado para versão RN 0.73"

git branch -M main

git remote add origin https://github.com/jacirgaio/Calculadora.git

git push -u origin main

git branch -m bug-fix

git status

git add .

git commit -m "Correção de fechamento de View"

git add .

git commit -m "Correção nas operações de multiplicação (*) e divisão (/)"

git add .

git commit -m "Correção nas disposições dos números"

git add .

git commit -m "Correção na lógica de case DEL"

git add .

git commit -m "Correção na função da tecla +/-"

git push -u origin bug-fix
```
